

Senior Engineering Leader

Department: Engineering

Location: Wales, WI

Contact: jobs@printfoam.com

PrintFoam, a 3D printing startup founded by MIT alumni, is hiring a team to change the way the world prints. Our technology prints high resolution stereolithography in minutes not hours and scales from millimeters to meters in length scale. We believe a company is only as good as its team, and we're looking to hire the best so we can be the best. Join us if you want a chance to reinvent the industry.

Our growing team is a mix of mechanical, material science, electrical, and software engineers. We build the next-generation of printers and materials to print at exceptionally high speeds across extremely large areas without sacrificing resolution or accuracy.

We're looking for someone who gets excited at the idea of working in complex systems and building something *better* from the start. Our small team will allow for autonomy to run with a project, while receiving mentoring so you can grow with our company.

We want a leader who sees the vision and importance of additive manufacturing at a large scale and wants to bring this technology to far reaching industries from aerospace and automotive to medical implants and performance footwear.

The Job:

- Push the capabilities of 3D printing by creating innovative solutions to challenging problems
- Lead a group of mechanical, systems and electrical engineers, designing, reviewing and guiding junior colleagues' work
- Prototype new systems, mechanisms, test materials, and research 3D printing challenges
- Architect the numerous subsystems of a 3D printer for performance, manufacturability and reliability

You:

- Product-driven thinker who makes excellent technical decisions
- Grows and inspires the people around them
- Seamlessly communicates across teams
- Leadership experience in one or more of the following:
 - Product development
 - Managing and building teams
 - Complex project management
 - Technical depth in your field

We are consciously working towards equal opportunity and diversity and are proud to announce it. We are an equal opportunity employer and value diversity at our company. We do not discriminate on the basis of race, religion, color, national origin, gender, sexual orientation, age, marital status, veteran status, or disability status.

Even if you don't check every box, but see yourself contributing, please apply. Help us build an inclusive community that will change the face of 3D printing.
